RE: Kentucky Approval of PE1000+

Dear Sir:

The Department added your product, PE1000+, for Type III designation by mistake. The Department has since removed PE1000+ from Type III designation for the ASTM C-881 Epoxy Resin Systems section the Department's List of Approved materials, per your follow-up request on November 4, 2010.

In line with our previous letter dated November 3, 2010, PE1000+ will be placed on the Department's List of Approved Materials for Epoxy Resin Systems meeting ASTM C-881 Requirements for the following types, grade and class:

Type IV, Grade 3, Classes B and C

Type V, Grade 3, Classes B and C

Please contact Derrick Castle of the Chemical Section should you have any questions regarding this approval.

Sincerely,

A handwritten signature in cursive script that reads "William Broyles".

William Broyles, PE  
Director  
Division of Materials
