Dear Mr. Buckley:

The Nevada Department of Transportation (NDOT) has completed its review of T308+. The affected division indicated that this product meet the minimum specifications for 728.03.02 EPOXY ANCHORING SYSTEM. As such the products will be added the Qualified Products List (QPL) under 728.03.02.

It must be emphasized that this QPL is only used to pre-qualify products and should not be construed as a performance guaranty. Also, product approval is not intended as an endorsement by NDOT. Your products will remain on the QPL as long as their performance is satisfactory. Poor performance in the field will result in suspension or removal from the QPL as per established NDOT product evaluation procedures. Please be aware, that any modification of your products or a change in manufacturer's name and address should be conveyed to the NDOT Research Division in a timely manner. Failure to disclose this information may result in suspension of this approval or removal from the QPL.

Should you have any questions regarding this matter, please contact me at 775-888-7894.

Sincerely,

A handwritten signature in cursive script that reads "Roma Clewell".

Roma Clewell  
Product Evaluation Coordinator
