Powers Trak-It C5 Gas Tool Wins the Shoot-Out at the Casino

COLUMBUS, OH – Powers Trak-It C5 gas fastening tool went head to head with the competition at Penn National Gaming’s newest Hollywood Casino construction site in Columbus, Ohio.

The comparison was conducted to judge the relative merits of three tools, determine the best performer, and select it for use during the \$10 million framing phase on the project.

The jobsite contractor from Columbus, Ohio, conducted the comparison using criteria such as ease of use, reliability and overall convenience. The C5 tool was rated superior in all categories with special note of its light weight, superior power of 105 Joules, and long battery life. The C5 gas was also determined to be reliable in the cold Ohio weather.

The ergonomically designed swing trigger was found to be easy to use with its light pull load of 2.65 lbs. During the shoot-out the C5 tool never experienced a jam, impressing the contractor with its dependability in the field.

Overall the Trak-It C5 was rated best, showing once again, that Powers’ fastening innovations out-muscle the competition on the job site.
